Varun Beverages: Capacity and acquisition led volume growth should compound earnings at double digits through FY2030E, but it is already priced in with flawless management execution.

Market Cap - ₹1,42,416 Cr.

High/Low - ₹556 / 381

Promoter Holding – 59.4%

FII Holding – 17.5%

ROE – 15.5%

Gross Margin - 55.2%

EBITDA Margin – 23.28%

Net Income Margin – 14%

Upside:

- Contract with PepsiCo is extended to April 2049.
- Organic and Inorganic expansions in Africa.
- Almost debt-free in India with term loans due to cash acquisitions outside India
- 50 State-of-the-art production facilities across the globe.

Key risks:

- Seasonal revenue which can be affected by unseasonal rainfall or cooler summers like what happened in Q2 2025.
- Volatility in prices of raw materials like sugar and plastic.
- Foreign exchange risk due to African operations.
- Shifting of consumer preferences.

Industry: Non-alcoholic ready-to-drink (NARTD) beverage and bottling sector

About: VBL has been associated with PepsiCo since 1990s and recently extended their contract to 2049. PepsiCo brands produce and sold by the company include Pepsi, Seven-up, Mirinda Orange, Mountain Dew, Tropicana juice and many more. They have their own brands product and are venturing into dairy products and snacks.

Revenue Breakdown

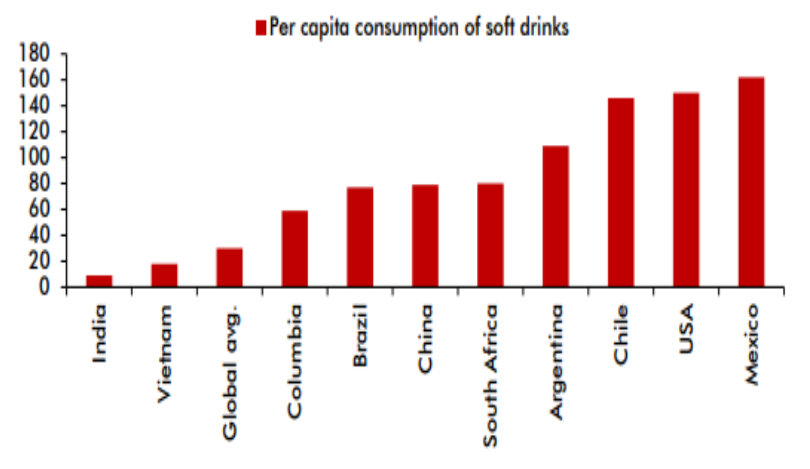

Share of Segment-wise Sales Volume

International revenue is 33% of total revenue which will be increase as the growth rate is higher for international revenue. Also the mix of low sugar / no sugar products has been increasing in the consolidated sales volume.

Exhibit 2: India's CSD per capita consumption is much lower than that of other countries

Source: Company, Ambit Capital research

Evolving youth preference and growth in disposable income in rural area is and will increase the demand for non-alcoholic beverages used for hydration, refreshment and energy drinks

India Volume Growth Rate

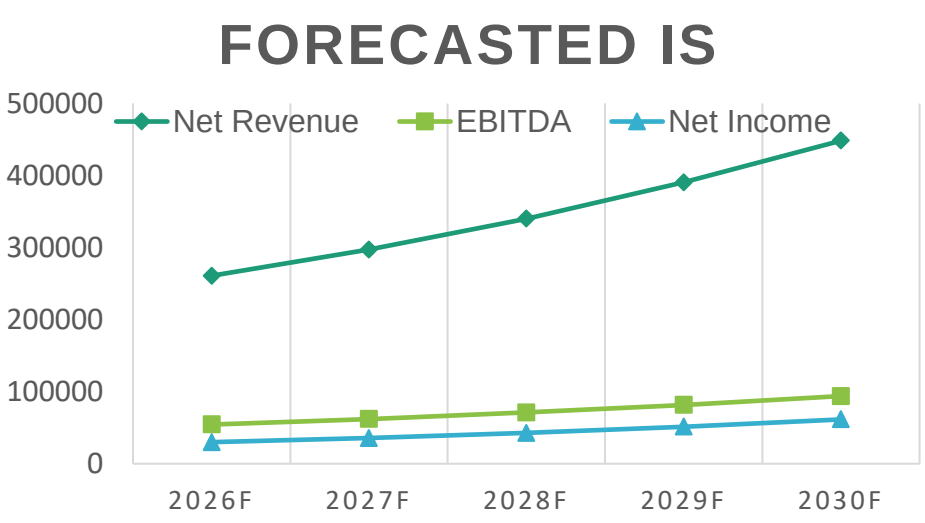

Base	11%	10%	10%	10%	10%
Best	14%	13%	13%	13%	13%
Worst	8%	8%	7%	7%	7%

Base case: In 2025Q4 concall the management mentioned double digit-growth on soft case and mid teens if the weather is good.
Best case: mid-teens growth possibility, if weather as well as the demand increases.
Worst case: Because of El-Nino the weather is favorable for the demand for the products, the rates are hardcoded to check sensitivity to valuation.

International Volume Growth Rate

Base	30%	15%	15%	15%	15%
Best	35%	20%	20%	20%	20%
Worst	25%	10%	10%	10%	10%

Base case: Mid-teens growth with 2026 growth includes the inorganic growth of Twizza acquisition.
Best Case: Better integration of acquisitions for distribution channels and higher growth rates.
Worst case: Just for sensitivity analysis of the growth in international market.

Risk free rate	**5.30%**
Equity risk premium	**7.45%**
Levered Beta	**0.5985**
Required Rate of Return	**9.76%**

Risk free rate: 10yr Indian government bond yield minus the default spread on India given by Moody.
Equity risk premium: 65% India + 35% South Africa implied risk premium sourced from Aswath Damodaran's website.
Levered Beta: Average beta of non-alcoholic beverage companies from US market adjusted for debt/equity ratio of VBL.

	FY26E	FY27E	FY28E	FY29E	FY30E
FCFE (in millions ₹)	15243.85	25883.53	31125.41	36882.30	43922.55

Terminal Growth = Risk free rate : I have used this rate as a firm cannot grow faster than the economy it operates in perpetually.

Reasons for higher growth:

- Improving profit margin because of added organic and inorganic operating leverage in both India and International
- 10Rs pack introducing semi-urban and rural population to companies product line adding to total demand.
- Acquiring customer by giving offers like the recent 250ml +150ml free for 20Rs.
- Increasing gross margin as the mix of low/no sugar products rise in the mix of total revenue.

VBL | HOLD | TP ₹225.59

Risk

- Sugar price and Pet cost rising due to ongoing conflict in the Strait of Hormuz
- Weather can affect the demand as seen in 2025 but there is no such risk in 2026 due to EL Nino
- Regulation like increase in tax on sin goods by government can squeeze profit margins.
- Contract with PepsiCo is extended to 2049 so the dependence risk is reduced.
- Exposure to foreign exchange risk due increase in mix of international revenue.
